Welcome to the TS Collection

The TS Collection's quality is not only a promise – it's a philosophy. As well as instantly adding value to your home, the TS Collection of replacement PVCu windows, doors and conservatories will vastly improve the look of your home, adding character, improving comfort and increasing safety, security and energy efficiency. Your home will become a quieter, warmer and more comfortable place to live in.

Whatever style of property you own, the TS Collection has the perfect product for you – whether town or country, period or contemporary, old or new.

*'Truly Stylish, Thermally Superior,
Technically Superb and Totally Secure'*

Total peace of mind – safety and security

Every individual component of the TS Collection is designed with security in mind, producing windows and doors of the highest security specification.

We only use the best performing hardware – hardware that out-performs even the latest industry and security standards. We offer - as standard – high security locking, which protects the most vulnerable areas of windows and doors from forced entry.

Beauty and form

The beauty of the TS Collection is that it has the looks and charm of a traditional timber window with all the functional, economical and hassle-free benefits of a modern PVCu equivalent.

Kerb appeal and appearance

The TS Collection boasts a range of aesthetically designed window profile to perfectly complement your home. Choose from the sculptured convex ovolo design or the concave scotia design, both of which have slim sightlines and are ideal for period properties, or our chamfered edge style for a more contemporary look.

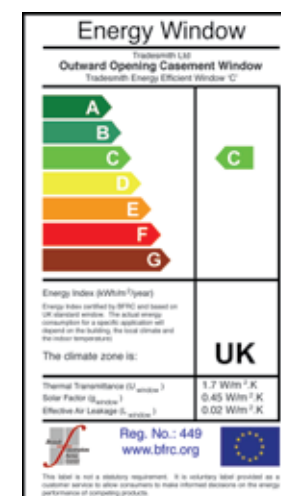

Choice and individuality are yours with the TS Collection.

Energy-saving performance

We offer energy rated products that are proven to keep heat loss to a minimum, retaining the warmth inside your home while keeping the cold out and thus significantly reducing heating costs.

These products are Window Energy Rated, which means they are certified for energy efficiency in the same way as domestic appliances.

Low maintenance

The high quality PVCu eco-friendly materials used in our products result in windows and doors that are very low maintenance. Unlike traditional timber windows our products do not rot, peel, crack or warp, no matter what the weather throws at them.

Pilkington energikare™

The TS Collection product range includes casement windows, residential doors, traditionally-styled French doors, contemporary patio doors, bifolding doors, traditional sash windows and conservatories.

Using Pilkington energikare™ in your windows will not only save you energy and money on your heating bills, it will also help the environment.

energikare™:

- improves the energy efficiency of your home.
- reduces the amount of energy you use.
- saves you money on your heating bills.
- is part of the Energy Saving Recommended scheme.
- is more effective than single or standard double glazing.
- is the only product that offers you the reassurance of Pilkington quality and that has the endorsement of the Energy Saving Trust.

Pilkington energikare™ reduces the amount of heat lost through your windows and it also allows more heat (energy) from the sun in through the window.

Casement windows

The TS Collection of windows can be made to the same style as the windows they directly replace or in a completely different style – the choice is yours.

We offer a wide range of beautiful styles, with opening configurations and sizes to suit and with decorative glass and Georgian bar options to complement the style of your home.

French windows

Unlike normal casement windows, our French window has the benefit of an uninterrupted view without the fixed mullion.

Vertical sliding sash windows

Our vertical sliding sash windows have a timeless elegance, made with beautiful proportions and symmetry.

Crafted with attention to detail, they have the authentic looks of the original sash window of a bygone era, retaining the character of the property itself.

Specialist window styles

The tilt and turn window is popular where an inward opening application is required, for instance where outside window shutters prevent a window from opening outwards.

It operates simply into 'ventilation mode', where the top of the sash tilts inwards. On closing the sash and further rotating the handle, the hinge mechanism is engaged, allowing the sash to swing inwards for glass cleaning.

Residential doors

Your front door is as individual as you are; it is a statement that creates a first and lasting impression of you and your home, so it makes sense to invest in it wisely.

We offer a wide range of front and back door styles, giving you the option to match the door it replaces or to choose a completely different look. We offer mix and match options of door styles, a variety of decorative glass patterns, complementary door furniture and a range of locking hardware.

Stable doors

Our stable doors combine great kerb appeal with high security performance, ease of use and low maintenance. The door can be split so that only the upper section moves and the bottom section remains locked, or so that it operates as an ordinary front door with both the upper and lower sections opening and closing as one.

Patio and French doors

Patio and French doors are ideal for extending your home into the garden, providing maximum light and airiness when opening up the doors.

Bifolding doors

Bifolding doors feature panels that are configured into a number of folds, which concertina open into a small space, allowing optimum light into a room with minimal obstruction.

They allow a wider opening from a house or conservatory, extending any home so you can enjoy the benefits of the outdoors and the garden all year round.

Bifolding doors are ideal where an opening or a partition is required between rooms, or where the home leads onto a patio area.

Conservatories

The TS Collection conservatories will enhance your lifestyle, allowing you to make the most of the outside while inside. You might aspire to one in order to create more living space, enjoy the benefit of natural light, enhance your home's appearance, or see it as an investment that will start to pay for itself from day one.

Make a statement with a conservatory that gives an air of luxury that you can enjoy all year round.

Choose from a 'T' shaped Edwardian or a 'P' shaped Victorian conservatory with a multi-faceted end. Our Edwardian design – rectangular or square in shape with no gable end - has a timeless elegance that complements all house styles, whether traditional or contemporary.

Glazing options to the roof are available from clear, opal or bronze polycarbonate to the latest self-cleaning glass from Pilkington.
